

# SELEVIT E

Both Vitamin E and Selenium have intensive influence on the cellular metabolism.

Selenium is an essential trace-element, while Vitamin E is a strong anti-oxidant.

SELEVIT E is a valuable nutritional aid in keeping Vitamin E and Selenium concentrations at an optimal level.

## COMPOSITION:

Glycerol, propylene glycol.

## NUTRITIONAL ADDITIVES (per kg):

Vitamin E (as  $\alpha$ -tocopherol acetate) 17 g

## TRACE ELEMENTS:

Selenium (as sodium selenite) (E8) 50 mg

## TARGET SPECIES:

Poultry, pigs, calves

## INSTRUCTIONS FOR USE:

Oral administration.

Poultry: 900ml per 200 litres of drinking water

Pigs: piglets: 1 - 2 ml

fattening pigs: 1 litre per 1000 litres of drinking water

boars and sows: 1 ml per 20 kg b.w.

Calves: 60ml per 40 kg b.w.

To be supplemented for 5 days.
